

BUTTERFLY CONSERVATION UPPER THAMES BRANCH

White Admiral Report 2010

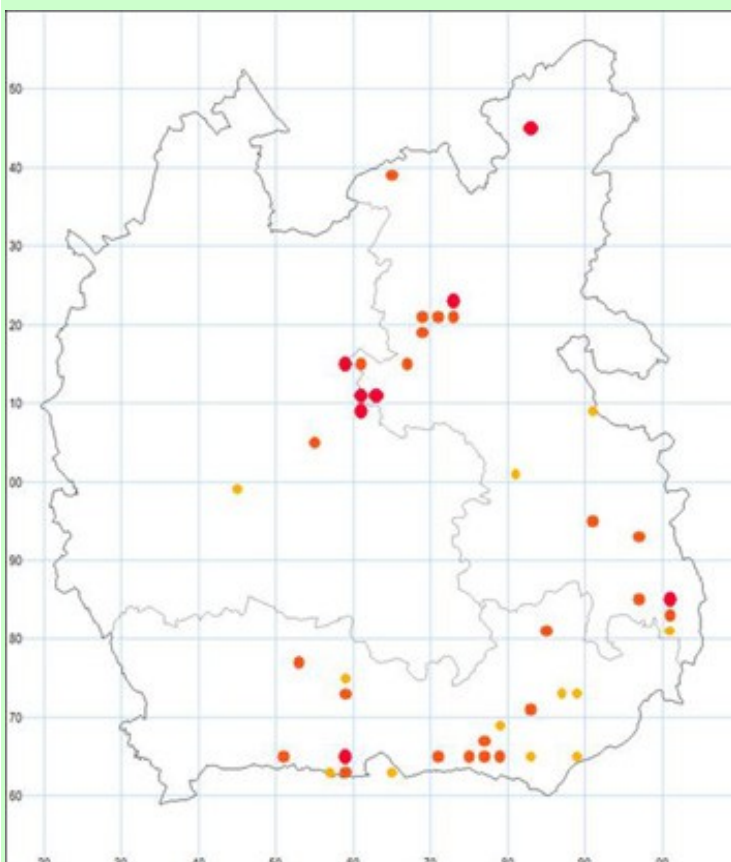

Richard Noble

White Admirals were seen flying in 38 different locations in Bucks, Berks and Oxfordshire during 2010 (2009 - 35), the main sites being Bernwood, Black Park and Waterperry Wood.

The first sighting was on 16th June (2009 - 16th June) and the last on 9th August (2009 - 2nd August). There were 8 occasions in June and July when daily sightings in excess of 10 were recorded. There were 95 individual sightings reported (2009 - 102) and my thanks are extended to the 39 members (2009 - 36) responsible for these invaluable records.
